

Training Center Access Requirements/Directions

***All persons 18 years and over MUST complete these steps before accessing the Training Center**

Steps for Covered Individuals

1. Go to <https://usacimbing.sport80.com/login>
2. Select the Membership Type- **Volunteer membership-Covered**
3. Your membership will show as “Action Required” until you have completed and successfully passed a Background Screen and SafeSport Training.
Note- If you are a renewing member, you may already have a current screen or training in which you would not need to renew at this time. The system will send automatic reminders when those are expiring.
4. To access the background screen, please click on the “Background Screen” tab on the left side of your dashboard, add the screening and work through the forms. This could take up to 10 days to process and once complete will automatically show on your account as “Current”. You will be notified in the event your screen is flagged or needs additional information.
Note- You will not be permitted to access the Training Center with a pending screen. Please plan accordingly
5. To access the SafeSport Training, please click on the “Center for SafeSport Training” on the left side of your dashboard, add the Core Training and work through to completion.
Note- The training takes 90 min to complete. If you are unable to complete in one sitting the course will remember where you left off and can be accessed anytime by logging back in your USA Climbing account and clicking on “Center for SafeSport Training” tab then “resume” course.

If you have already completed your Core Training, only the 15 minute refresher “Refresher Course: Recognizing and Reporting Misconduct” is required. You will access this by clicking “Add Center for SafeSport Training”

Only one course is required annually- you do not need to complete all refreshers at once.
