

USA Climbing Ineligible Participants

The following individuals are currently ineligible to participate within USA Climbing. These individuals may not be granted certification or membership, nor permitted to participate in any USA Climbing sponsored or sanctioned activity. The status information shown below does not necessarily indicate a final adjudication, may reflect an interim measure intended to protect the safety and well-being of athletes and other participants, and should not necessarily be interpreted as final. Administrative Holds or minors included on the ineligible list should not be shared outside of those included on the communication. If an event organizer (or Regional Coordinator) learns of an individual participating or attempting to participate that is on an administrative hold or otherwise ineligible, it should be reported to USA Climbing and the Center. If an NGB must inform an individual that they cannot participate, inform the individual that there is an issue with their eligibility and they must contact the U.S. Center for SafeSport at resolutions@safesport.org or 833-587-7233. You should not provide any other details of the allegations.

The list below is not an exhaustive list of individuals who have committed USA Climbing actual or alleged conduct violations, nor is it an exhaustive list of individuals who are not currently eligible to participate or who previously were not eligible to participate. By way of illustration and without limitation, the list below does not include persons who are serving or previously served a probationary period; may not include those who served a prior period of suspension, or who received a warning; does not include individuals whose cases were administratively closed by the U.S. Center for SafeSport such as for lack of jurisdiction or insufficient information; does not include persons who failed to attain a USA Climbing certification such as for failing to pass a background screen.
